

Junior C# Software Developer – Ag-Tech

Overview

Croptimistic Technology (SWAT Maps) builds leading-edge technology for Precision Agriculture. We are a stable start-up company that has been in business for several years. We are starting to really scale, heavily investing in R&D, and building new cutting-edge products.

We are looking for a talented Junior C# .NET developer to join our team. Our top priorities are a great attitude and the desire to learn and become a professional developer.

A willingness to learn clean coding best practices such as SOLID principles and test-driven development is a must.

We develop for mobile, desktop, and web and have complex backend services. This position will have a lot of variety including GIS, 3d, AI, & cloud services.

If you are a junior coder looking for a position where you will write lots of code and learn tons about .Net then this position is a great fit.
